SUGGESTIONS TO AUTHORS OF PAPERS

..... MANUSCRIPTS

Address all correspondence regarding manuscripts for publication, proofs, etc., to R. W. Thatcher, Agr. Exp. Station, Geneva, N. Y.

Suitable articles concerned with instruction, demonstration, experimentation or research in agronomy will be accepted for publication. It is understood that articles submitted for publication have not appeared previously elsewhere and that they will not be offered for simultaneous publication in other journals without the consent of the editor of the JOURNAL OF THE AMERICAN SOCIETY OF AGRONOMY.

Papers of any length, between 1 page and 30 or 40 pages, can be used. Personal and institutional items of agronomic interest, suitable for inclusion in "Notes and News," are solicited.

To be accepted for publication, manuscripts should be original typewritten copies (not carbons) double- or triple-spaced, with wide margins. Special care should be given to the proper indication of main heads and subheads in the text, to preparation and description of tables, to citations of literature and to illustrations. For fuller details see recommendations on pages 322 to 325 of volume 10 of the JOURNAL and examples in recent issues.

All illustrations desired should accompany the manuscript, should be numbered and described, and referred to in the text. Line drawings must be made in India ink and glossy velox prints of photographs are preferred for half-tones.

REPRINTS

Fifty reprints of each article will be furnished free. Additional copies will be supplied at a nominal charge. Covers with printed title page, 50 covers \$2.00, and 85 cents for each additional fifty copies. Orders for reprints and covers should be sent to the Editor immediately on receipt of proof of the article.
